TOGETHER WE CAN

MINI DISPOSABLE PRODUCT CATALOGUE

AVAILABLE FROM
METRACLARK

Refrigeration & Air-Conditioning Wholesale

INTRODUCTION

A-Gas South Africa is launching R22, R134a, and R410A refrigerants in smaller disposable cylinders into the Metraclark wholesaler market to meet evolving customer needs and improve market accessibility.

The smaller packaging offers greater convenience for contractors and service technicians who require flexibility for smaller jobs, limited storage space, or on-site servicing.

This product expansion supports Metraclark's commitment to offering a complete range of refrigerant solutions, while strengthening A-Gas's presence in the retail and light commercial segments. It also aligns with A-Gas's strategy to enhance customer choice, ensure supply reliability, and maintain competitiveness in a dynamic HVACR market.

R134a DISPOSABLE

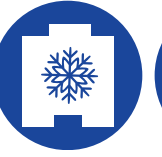

4.5KG

- R134a is a HFC, used in automotive air conditioning.
- As a replacement for R12 and R22 in medium and high temperature refrigeration applications, such as commercial and domestic refrigeration and chillers.
- R-134a is an HFC refrigerant, which requires polyester (POE) lubricant to be used in the compressor.
